23	USERS	1 : 0..N	WISHLISTS	saves
24	EVENTS	1 : 0..N	WISHLISTS	saved as
25	USERS	1 : 0..N	FOLLOWS	follower
26	USERS	1 : 0..N	FOLLOWS	followed

Catatan implementasi

- Unique composite index: WISHLISTS (customer_id + event_id), FOLLOWS (follower_id + organizer_id), REVIEWS (customer_id + event_id).
- status (TRANSACTIONS), type (POINT_TRANSACTIONS), role (USERS), dan discount_type (VOUCHERS) sebaiknya dibuat enum di implementasi.
- Perubahan kursi (EVENTS.available_seats, TICKET_TYPES.available_quota), poin, voucher, dan kupon saat transaksi dibuat, expired, canceled, atau rejected harus dibungkus SQL transaction.
- organizer_id di EVENTS dan FOLLOWS divalidasi di aplikasi agar hanya berisi user dengan role organizer.
